

POOJA PATEL

Final Project Ideas

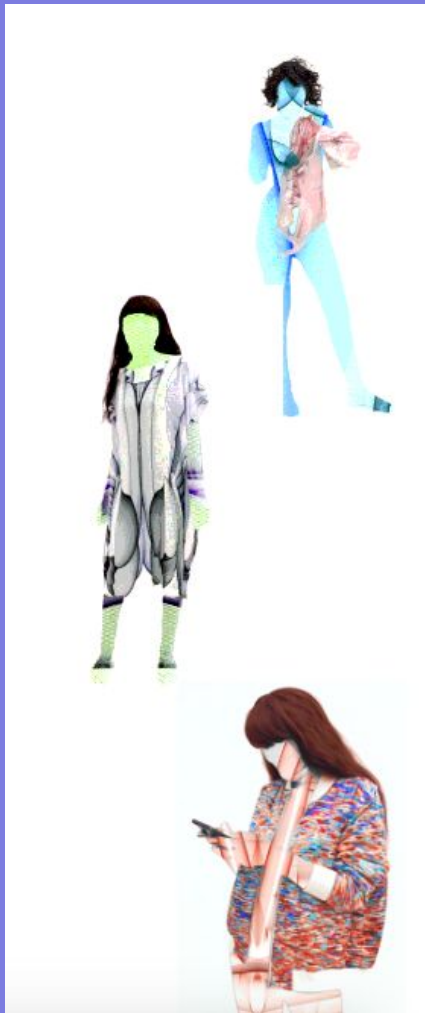

IDEAS

1. Application that gives you clothing options based on current weather.
2. Game in which the character must avoid the spiders on the screen. Once attacked by 8, GAME OVER.
3. Musical Ballet. An application in which each key is associated with a sound, color, and movement.

IDEA #1:
WEATHER BASED
CLOTHING GAME/APP

ABOUT

- Uses openWeather API
- If cloudy: clouds appear
- If sunny: sun appears
- If rainy: rain falls
- If windy: sound of wind
- Background based on time of day (sunset & sunrise)
- clothing options appear based on current weather of city entered
- models in clothing in 3d
- day and night options

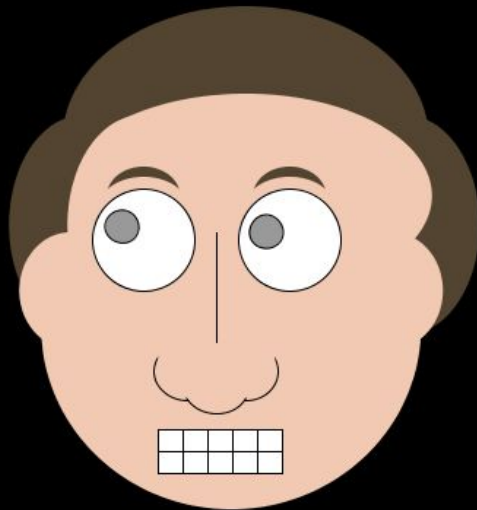

Ex 7

8 SPIDERS GAME

ABOUT

- Spiders appear one by one
- As game progresses, more spiders appear
- Head/subject is controlled by mouse
- With each attack, head gets bigger
- After 8 attacks, the game is over and stats are displayed
- User can customize character head at the start of the game

MUSICAL BALLET

THREE

- Each key represents a musical note/sound of varying instruments
- Pitch of the sound will represent a color
- Background changes as sound does
- Each color is linked to a movement, which is triggered when that color is displayed
